Benefits

- ▶ **BIOSAFETY:** Communication without direct contact. Manufactured in aseptic materials, easy to clean and disinfect.
- ▶ **AGILITY:** Immediate and efficient communication.
- ▶ **RESISTANCE:** Manufactured in aluminum and steel, for heavy duty environments.
- ▶ **EFFICIENCY:** Reduces service times, increasing efficiency, generating greater profitability.
- ▶ **ORGANIZATION:** Allows to organize the queues, improving attention quality and corporate image.
- ▶ **HEALTH:** Easily detects the sound of the voice, avoiding unnecessary strains.

DUALVOX - LTC-06L

Listen and Talk for Counter

Window intercom model for acrylic barriers. Easy to install, does not require mounting in the acrylic or glass.

Designed for areas with moderate ambient noise such as offices.

Projects an excellent corporate image thanks to its elegant presentation and resistance to heavy work.

Consists of an internal desktop unit and an external desktop speaker. Includes a power adapter.

Product features

- ▶ Manufactured in aluminum and stainless steel, completely aseptic materials.
- ▶ Easy installation without drilling or mounting in the acrylic.
- ▶ RJ9 connector for optional use with a headset (not included).
- ▶ Sound alarm for emergencies.
- ▶ Internal and external volume control plus mute function.
- ▶ Audio processor, enhances clarity with natural voice volume.
- ▶ Selector for calibrating the sensitivity of the internal mic.
- ▶ Automatic volume attenuation function: reduces internal volume after 30s of inactivity and restores it when detecting voice in the internal microphone.
- ▶ Manual use for privacy: opens the communication channel by pressing the PTT button.
- ▶ Effective communication using face masks.
